The Power of Choice: student-led learning for real-world communication

SEMINARIO GRATUITO ONLINE

Per docenti di Lingua Inglese

PROGRAMMA

A two-day online seminar exploring how choice boards shift language learning from teacher-directed to student-driven, grounded in applied linguistics research and classroom practice.

Discover why choice transforms motivation and acquisition, learn design principles for differentiated boards, and build customisable activities for primary through secondary learners (Pre-A1 to C1).

Leave with ready-to-implement templates and strategies that support all four skills while preparing students for exams and real-world communication.
